EUROPEAN COUNTRIES & CAPITALS

Welcome to a fun program, designed partly as a general knowledge quiz, and partly as a tutorial...what on? The Countries of Europe and the Capital cities of those Countries. It sounds easy at first, but how many can you name without looking them up? 26 of the European Countries and Capitals are covered by this program. Each Country's outline appears on your screen as a clue.

The program includes detailed instructions on what you need to do to play. Remember, your spelling has to be correct, as the computer is very strict, and awards no merits for 'almost correct' answers.

It really is the best way to learn!

LOADING
'EUROPEAN COUNTRIES & CAPITALS'

1. Set up your Atari Personal Computer System as detailed in the relevant booklets that accompany your Atari products.

2. Ensure that your computer is switched OFF, but your Program/Data Recorder and TV/monito. are switched ON. Increase the volume on your TV/monitor so that you can hear it.

3. Atari BASIC is required. If you own an Atari XL or XE computer, it is built in. If you have any other Atari 8-bit computer, you will need to plug-in your BASIC cartridge.

4. Switch your Atari Computer ON. The word READY should appear.

5. Insert 'European Countries' cassette into Program/data recorder and rewind to beginning of tape. Press PLAY on the Program/Data recorder.

6. Type the letters CLOAD on your computer keyboard, and press the RETURN key.

7. You will hear a short tone. Press the RETURN key on the computer keyboard again.

8. Part of the 'European Countries' program will load into the computer memory. When complete, the word READY will be displayed. Type the letters RUN and press RETURN.

9. The 'European Countries' program will continue loading into the computer memory. Whilst loading, you will hear some music, and some spoken information about this program.
