# PAC-MAN

A Warner Communications Company

# THE ESSENTIAL PAC-MAN

At 10 points each, these are a dot-chamber's delight.

## INSERTING THE CARTRIDGE AND JOYSTICK CONTROLLERS

Turn on the ATARI® Home Computer by pressing the power switch on the right side of the console to ON. Pull the release lever towards you to raise the cartridge door. (Whenever you do this the computer automatically turns itself off.)

Insert the PAC-MAN game cartridge into the slot (the left cartridge slot in the ATARI 800™ Home Computer) with the label facing you. Press down carefully and firmly. Close the cartridge door, and the computer turns on again.

For one player, plug a Joystick Controller into Controller Jack 1. For two players, plug a second Joystick Controller into Controller Jack 2. Hold the Joystick so the red button is in the upper left corner.

## THE SELECT KEY

Press the SELECT key on the computer for a two-player game. Press it again to return to a one-player game.

## THE START KEY

Press the START key on the computer to begin the game or restart the game at any time. The button on the Joystick will also start your race through the maze unless you're in the middle of a game.

Watch out for these gobbling goblins — they're nothing but trouble.

Eat an energy dot and you can gobble those goblins back.

For an extra treat, keep your eyes open for tasty bonus nuggets.

## THE OPTION KEY CHANGES DIFFICULTY

Press the OPTION key to change the level of difficulty you start at — represented by symbols below the maze. Cherries are the least difficult. Each time you press the option key the symbol changes, from cherries to a strawberry and so on up the scale.

## THE SYSTEM RESET KEY

The SYSTEM RESET key on the computer resets the game, returning to the one-player selection and the lowest skill-level option. The high score from any previous game is retained on the screen, until the computer is turned off.

## THE SPACE BAR PAUSES THE GAME

Press the SPACE BAR on the computer if you want to pause in the middle of a game. Press the SPACE BAR a second time to pick up where you left off.

 **TURNS REMAINING**

**SKILL LEVEL** 

"At ease, Cadets. Welcome to strategy school. Cadets, I know your chances aren't good. So I'm warning you: you won't be coming back after today. Survive, and you'll be a lot safer."

"When they leave the goblin house, the goblins go to a particular corner of the maze for you with a particular pattern. Their eyes peeled after you, the maze, the pattern of the maze, and the goblins search for you harder and faster."

"Once the goblins get your scent, you better get moving. You can gain a bit on a goblin by turning a corner. Use the exits to gain a bit or evade them. Try to make them lose your scent by changing direction rapidly."

"If they're onto you, stop munching and run down an empty corridor. You go 20% slower when you're munching dots."

"The survivors tell me it's tough to get away from the goblins. But stay far enough away from them for 20 seconds, and they'll give up and go back to the goblin house. Better watch out, though. When you're munching the last ten dots, the goblins team up and sniff you out like bloodhounds."

"One last word, Cadets. Use your energizers wisely. Lure all the goblins into an empty maze, then gobble 'em all down. Gobbling the first one is worth a measly 200 points, but the fourth adds a whopping 1,600 points to your score."

"Be extra careful with your energizers after the second maze: the goblins stay true for less and less time."

"Good gobbling and good luck!"
