

## Welcome To PRGE 2014

A scroller here, a few pretty graphics there, and there you have it, a Jag demo welcoming all to the 2014 Portland Retro Gaming Expo.

This demo is the product of an invite from Eight Bit Fix, and a couple months of effort from the aspiring developers of BitJag. We wish to personally thank Eight Bit Fix for inviting us and providing a way to get our first physical release into hands of Jaguar fans.

We want to personally thank the Removers for creating an awesome library that has helped us begin our journey developing for the Jaguar. This demo was exclusively developed with the Removers libraries.

We also want to thank the work that Matthias Domin, Reboot, Orion\_, and many other developers have put into software tools and additional hardware for the Jaguar.

Thank you!
