2nd April 1991

Hi! Sammy Joe,

I don't know if you'll be back by the time this arrives on your doorstep, but here are my articles & programs for release on Maggie 5. Before you faint at my delivery of articles, I'll warn you that there are a few more to be written yet - a promise is a promise !!!

Anyway, on the disk enclosed are:-

- i) My first article (about a year late ??) for Maggie - how to include & use fonts within GFA BASIC v3.5 !!
- ii) A small program allowing you to depack ICE packed files - Please include this one on Maggie, as I want it distributed as best as is possible, and that's only possible through Maggie !!
- iii) Another tiny program to grab sectors from disks and store them in files - ideal for hacking, but I never said that !!
- iv) An Amiga music module which is a version of 'Transylvania' by Iron Maiden - I knew you'd want it, so here it is !!

Right, any problems let me know. I managed to rescue my friends hard-drive, and Professional Virus Killer was released on 11th March 1991. I've got a demo version that you can release on Maggie 5 if you want to, let me know a.s.a.p !!

See you,

Mike 'Bunny Ass ?????' Mee

P.S. Who gave me this damn name ???

8th April 1991

Hi! Sammy Joe,

Following on from your phone call, I knocked up this little package for you. I have enclosed three disks, one has the demo version of Professional Virus Killer v2.0 on it - I'm afraid it is a bit big at 150K of disk space, but how about another 2-disk Maggie ???

The other two disks are blank because the original copies of the Orlanders Code Compil are so severely screwed that I wouldn't trust them to store a 'DESKTOP.INF' file on them, never mind source code !!

Here is the reminder of what else I would like:-

- i) Ice Packer v2.3 - I'll update my ICE Depacker ready for Maggie 5.0 if it is required ???
- ii) Any other packers - eg. Pompey Pirates, Gollum. Have you got a copy of the Fire Packer by Axe of Delight ??? I'm trying to get hold of all the major packers, so that I can write a complete collection of depack programs (see ICE Depacker Docs. for more details !!).
- iii) Delta Force Picture Ripper - you said it was good, so I'll have it. Anything for a good mess about with !!!
- iv) Any other amazing packers, copiers, utilities of any useful, and ESPECIALLY the 'Turbo Assembler' (is it in English yet ??) if you have it.

Some source code for Maggie, I've got a few improvements I would like to add if you like ????

I'll be releasing Amiga Modules No. 4, 5 & 6 soon, and also I've got two disks full of hacked Quartet music !! This includes 'Cadaver', 'Speedball 2' and loads of other stuff !! I hear Gods is going to have some Quartet music in it, so I'll probably have a go at hacking that music out too !!! It's all your fault - this music hacking I'm doing, if you hadn't given me all those music files at the 16-Bit Fair, I'd still be using the 8 files I had from the old ST News disks !!!

I've written too much for someone as 'laid back' and 'take it easy' as yourself, so read this letter in two sessions, so you don't injure yourself too much !! Like wow ... heavy ... cool out pass the weed ... etc. etc. etc.

See you,

Mike Mee
