Hello!!!

I'm a 17 year old boy who recently got your "Mindbomb" demo. I have to say that it was one of the most impressive megademos I've ever seen. I myself has been trying to make just a demoscene (which hasn't gone to well so far). That's the second we ason I write. In your PD screen in

"Mindbomb" demo you writes about something called "Demo Utilities". I wonder what this is (is it something you use when you do demos?) I also have been having some problems with doing music, I know how to get just a tune but I can't understand how to get long music pieces so I wonder isn't there any music program which can save your music piece in
